Making a Simple Clutch

by hahnsatelier

Today, Im gonna make a simple clutch

It's a simple leather clutch.

It made with a simple design and I used only one metal small stud closure. Hope it helps.

Thanks!

[Leather thickness]

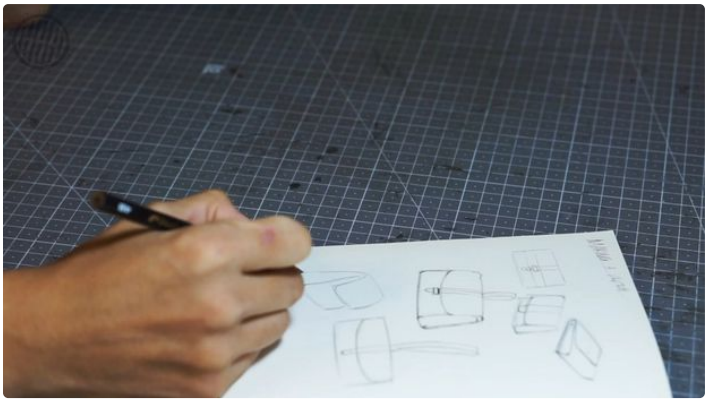
Leather : 2.3t (6oz) Skived edge : 0.8t

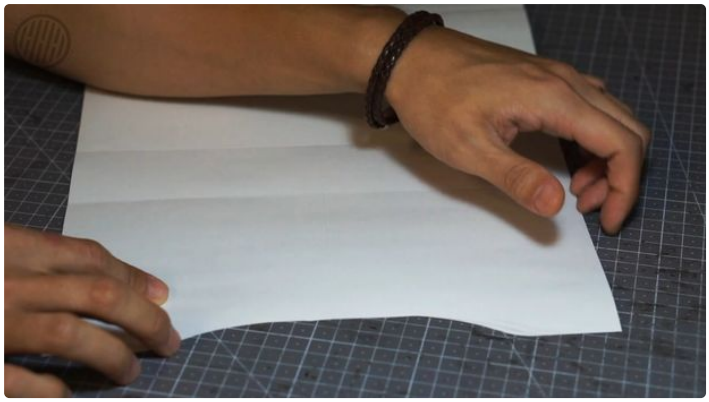
https://youtu.be/UK2BXHcM5JM

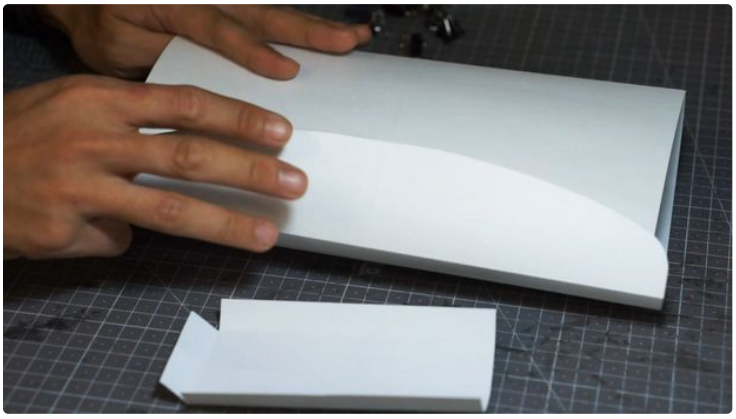
Step 1: Sketching & Making Pattern

Sketching and making the pattern.

Im making pattern and design shape at the same time







Step 2: Making on the Leather and Cutting

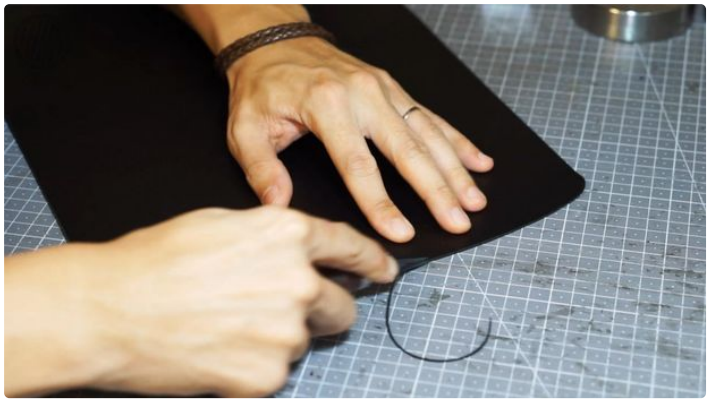
Mark on the leather by owl

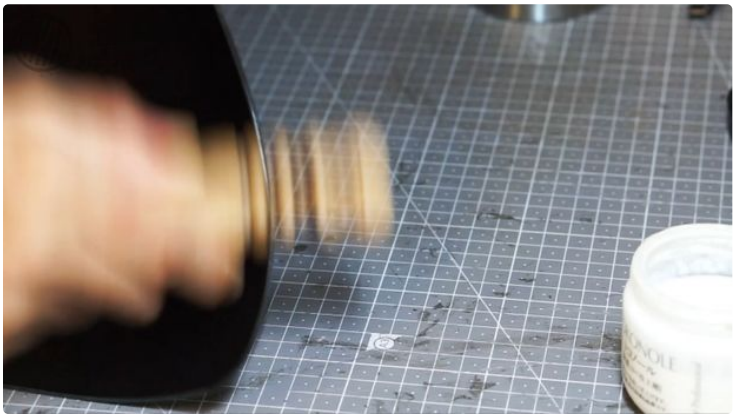
Cut the leather following the mark

Step 3: Edge Beveling

Bevel the edges and apply a gum (Tokonole)

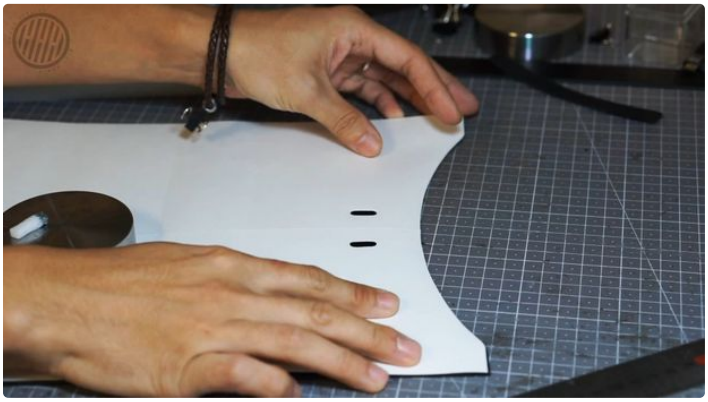
Burnishing with a slicker

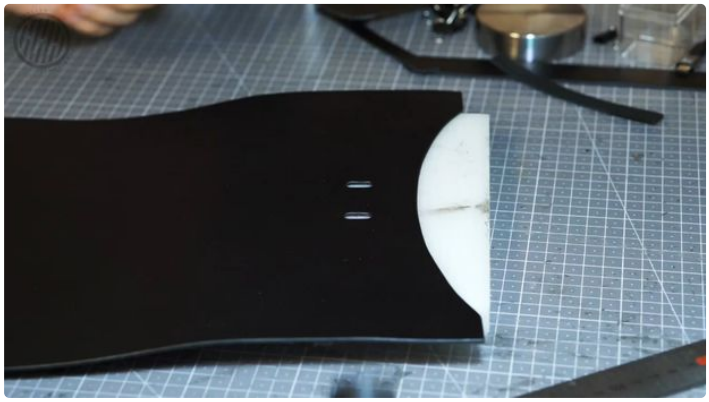




Step 4: Making Center Loop Hole

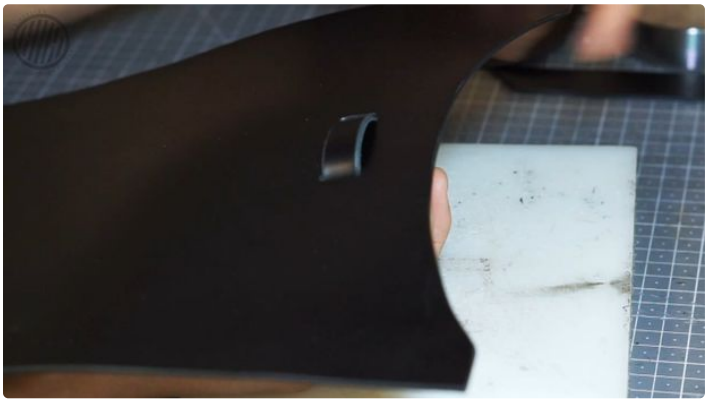
Following the pattern, make a two holes on the leather.

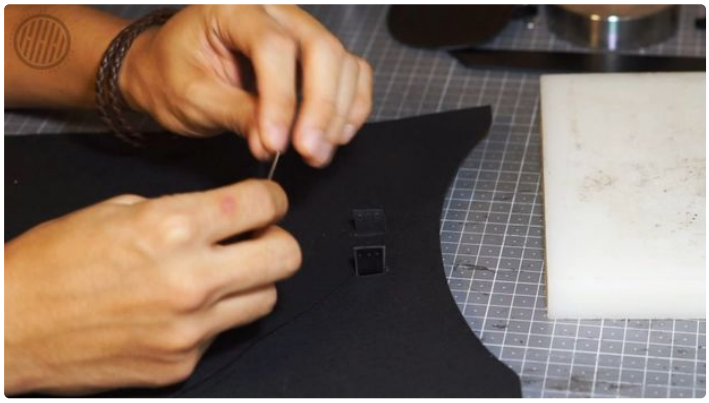


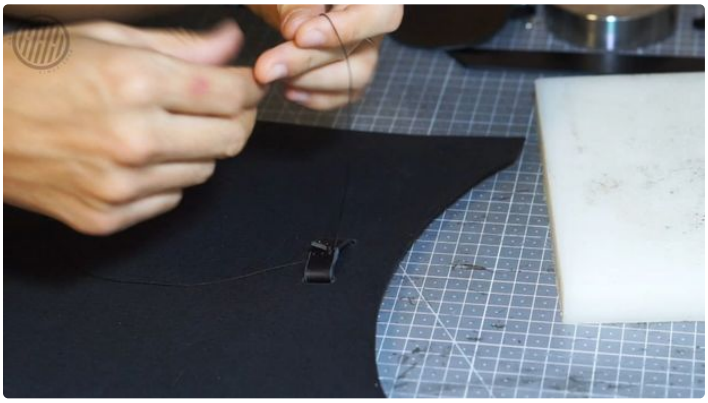


Step 5: Stitching Loop

Make a stitch holes for tiding behind and cross stitching





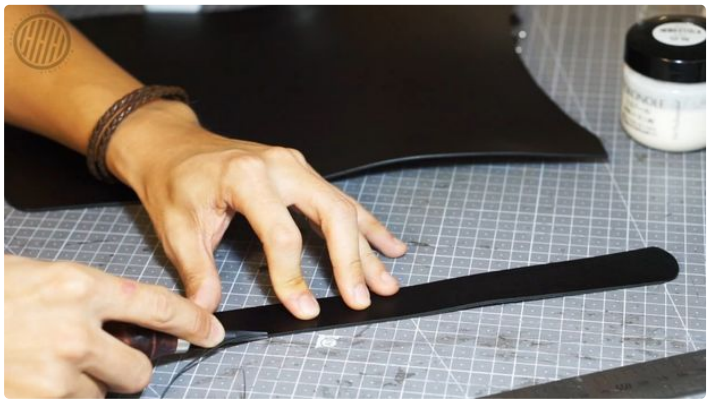


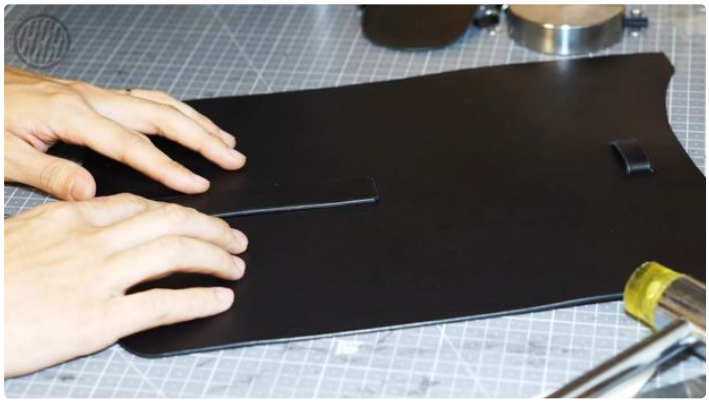
Step 6: Making a Center Strap

I used a strap cutter

I cut an oblique line

Adding creasing line is optional





Step 7: Side Panel

apply a glue edge area for side panel

Attach edge first, and put center of the round bottom

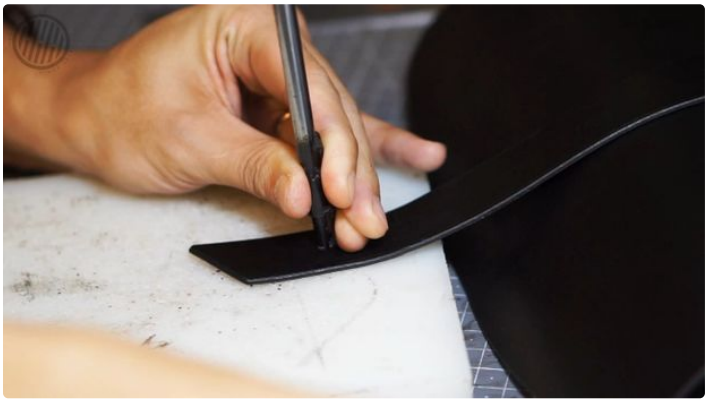
I used a machine but handstitching is possible 100%

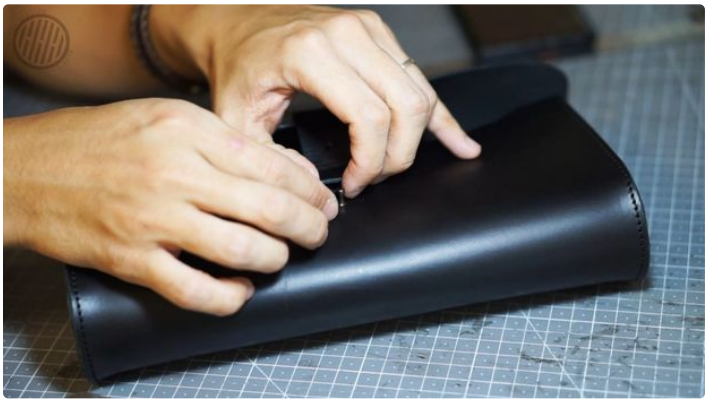
Step 8: Attach Stud Closure

This is the only part of metal (Stud closure 4mm)

This is Punch that can make hole and line same time

Put a strap on the loop , Put it in the stud closure and close





Step 9: Done!

Thanks for watching! =)

If you need the pattern , please come to my youtube channel

Good luck with your project!
