

Instructions:

1. Cut out the paper patterns with a scissors or a cutter.
2. Trace the paper patterns to the upper material and the insole pattern to the foam.
3. Flip the patterns and trace the right shoe.
4. Mark the holes on the upper material with a push-pin through the paper pattern.
5. Cut out the upper material with a scissors or a cutter (make sure it is sharp).
6. Punch the holes in the upper material with the holepuncher (2,0 mm)
7. Cut the thread in half and put it through the needle.
8. Start stitching at the back. Choose a hole; just before the heelpart goes up.
9. Start on the inside and make sure the hole on the upper matches the hole in the sole.
10. Go through this first hole and leave about 3 inches of thread hanging on the inside.
11. Go through the holes one by one. This is the first of two stitch rounds.
12. Keep the right tension: Just before a curve in the edge of the sole appears.
13. Go around. Add the front piece when you reach the last hole of the back piece.
14. When you reach the point you started, turn around for the next round.
15. Go around the second time. Use the same tension as the first round.
16. When you reach the start again: take of the needle and make a knot.
17. Lace 'em up!
18. We would love to see the result: @sneakerkit #sneakerkit #lilsneakerkit

Lil' SneakerKit

DIY sneakers for the first steps: 11-17 months / EU 20 / US 5.

All materials included: natural rubber soles, insole foam, leather, laces, needle, thread, paper patterns.

Tools needed: pencil, scissors/cutter, holepunch plier.
