Dog Harness 1

This is a harness for small dogs (chihuahua, toy terrier, yorkie, all the miniature pups) that weigh around 4-6 pounds and have girth around 10-13 inches. You can adjust the length of the straps according to your dog's measurements.

Materials:

I recommend using 2-3 oz leather (veg or chrome) with medium temper. But you might try different materials to see how they work.

Hardware:

3 x 5/8 buckles

1 x 3/8 D-ring

Rivets

Tools:

Scissors, knife.

Mallet, rivet setter, hole punchers (round for rivets and oblong for buckles).

Instructions:

Print the pattern at actual size (100%). Use the reference on top of each page to make sure everything is printed correctly. Join the pages together.
