
LEATHER AVIATOR CAP

Assembly instructions

Difficulty level:	Intermediate
Completion Time	12 - 16 hours

NECESSARY TOOLS

B&W Printer

Scissors or a cutter

Hole Puncher (We recommend 1.8 - 2 mm sized holes for this build)

Approx 4 square feet of leather. (We recommend 6oz leather for this build)

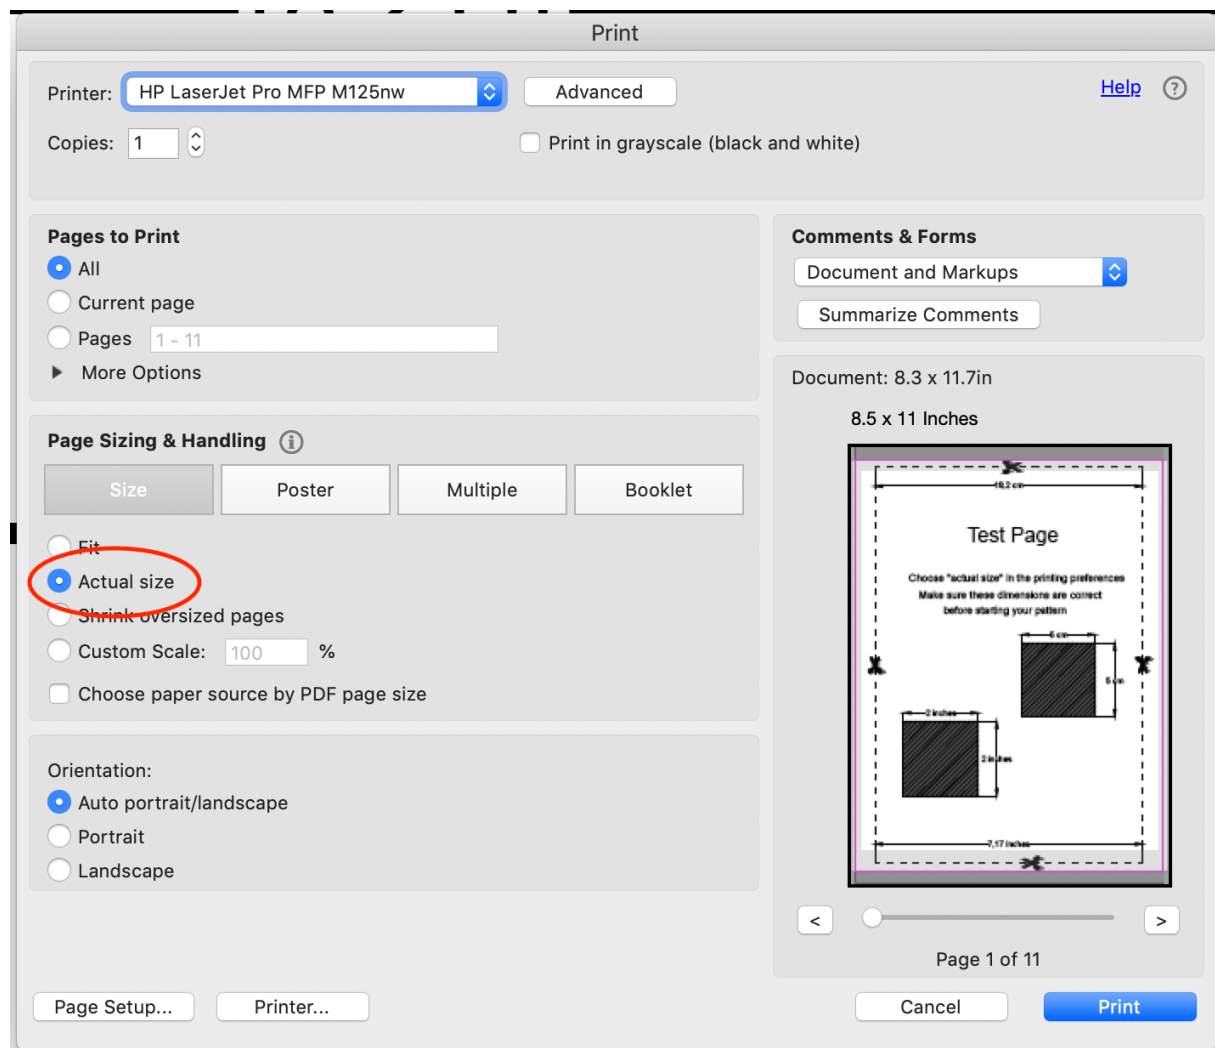

Thread and needles (We recommend 1.2 mm waxed thread for this build)

1 Buckle and a few rivets

PRINTING THE PATTERN

Set up your paper size to A4 and choose actual size in the printer settings

Alternatively you can use “letter” format which is approximately the same size and will not impact the size of the product significantly

Print all the patterns. Take note that some of the larger parts are spread over two or even three pages. Use the second page of the pattern as an assembly guide

In order to further help with your build, we filmed the entire process from the start to finish.
Please access your instructional video here:
