

Step by step sewing

Very important:

- As soon as all the details are cut out, mark the marker on both sides of the mark, as in the template
- All holes must be used when stitching
- Cut off the threads more than necessary, so that in case of parting, you can continue sewing without any knots
- In this product, each part begins to be sewn from the first hole. The end of the line respectively in the last hole of each part
- If an extra hole is missing or one hole is missing, you can cut the seam to the very beginning by simply cutting off the needles
- If in doubt, always count the holes on both parts. Everything is checked and sewn several times by me personally, all the holes match!
- Take your time, if you are tired, then put it off for the next day
- If you have any questions, please contact me at [ETSY](#) and I will help you in any way I can
