
LEATHER RABBIT MASK

Assembly instructions

Difficulty level:	Beginner
Completion Time	4 - 5 hours

NECESSARY TOOLS

B&W Printer

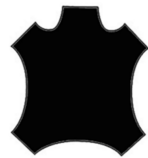

Scissors or a cutter

Hole Puncher

7 square feet of leather

Thread and needles

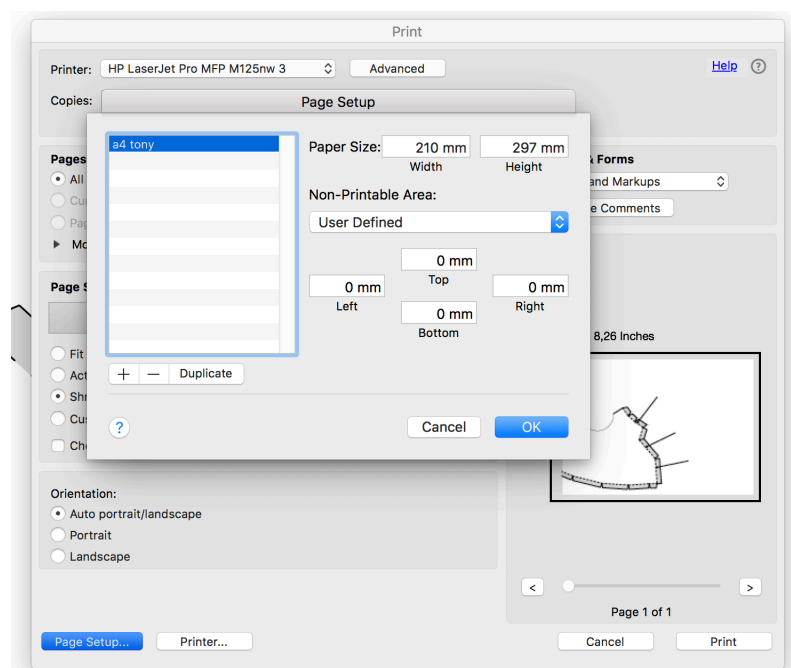

An elastic strap

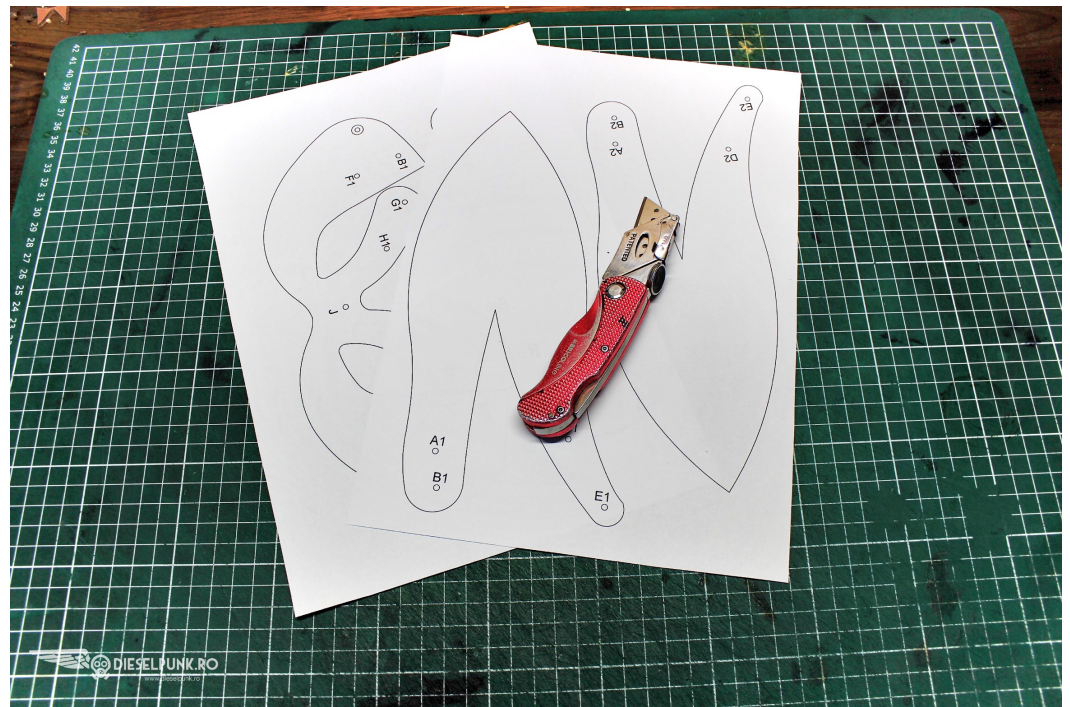

PRINTING THE PATTERN

Set up your printer to A4 paper with no margins on landscape mode.

Alternatively you can use “letter” format which is approximately the same size and will not impact the size of the product

Print your patterns.

Next cut all the patterns. At this stage you don't need to be precise and cut exactly on the black line.

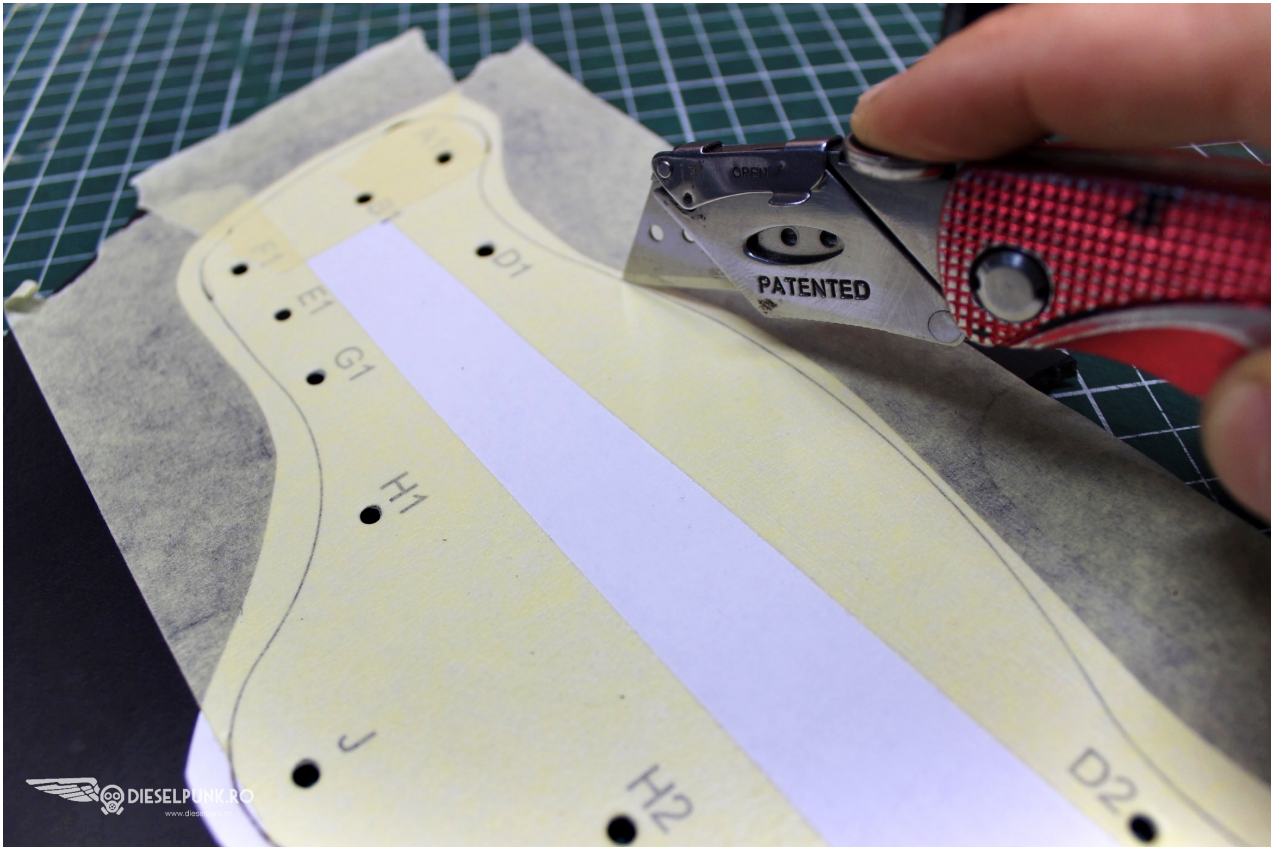

Paste the paper cutouts on the leather with masking tape. I recommend using leather of at least 5-6 oz

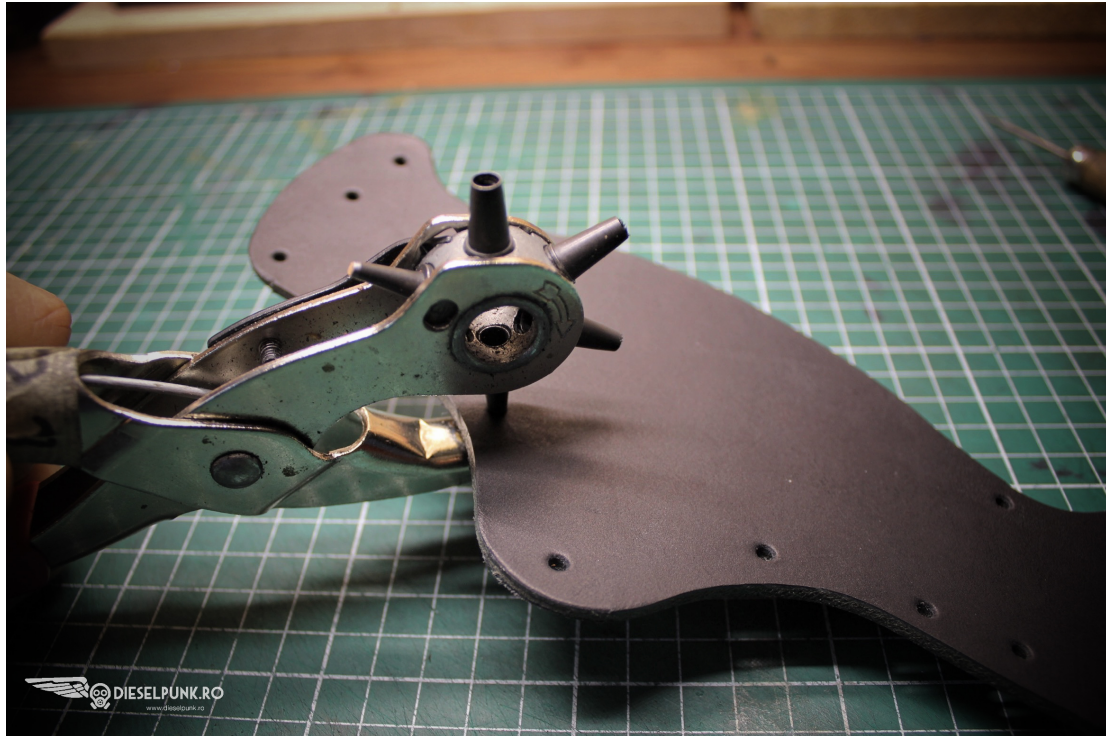

Mark the holes before cutting the leather

Time to cut the leather. Use a sharp blade and keep the cutting perpendicular on the leather and away from your fingers. Take your time to make sure you cut straight on the line. This is the most important stage of your build so give it all the attention you have. Avoid any mistakes to save time and material.

Use a hole puncher to make all the holes you marked earlier. Use a size that fits the rivets you will be using

Cut all the leather pieces and then finish punching all the holes. You should have something like this when you are done: 2 separate ears, the forehead and the eyes piece.

Use the paper cutouts to connect all the leather pieces with rivets in the right way. All the holes are coded with numbers and letters to make this process easier.

The only two holes unmarked will be used for setting the elastic strap in place

After you are done you should have something like this.

All you have to do next is attach the elastic band and you are ready to wear the mask.

To further help all our clients we created this FaceBook group for everyone to share ideas and stay up to date with the latest patterns available. Please follow the link below to join.
