

South 711

The image contains two identical, empty coordinate grids side-by-side. Each grid is a square with a horizontal x-axis and a vertical y-axis. Both axes have tick marks every 1 unit, with the origin (0,0) at the bottom-left corner. The grids are intended for graphing the functions $f(x) = 2x^2 - 4x + 1$ and $g(x) = -2x^2 + 4x - 1$.
