Paper format: A4*

Mini Drawstring Pouch

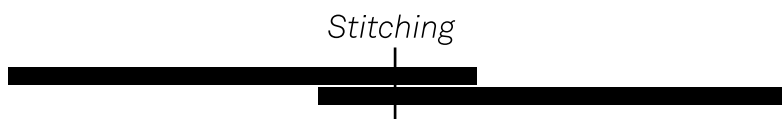

Instructions:

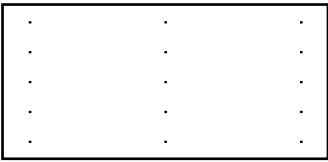

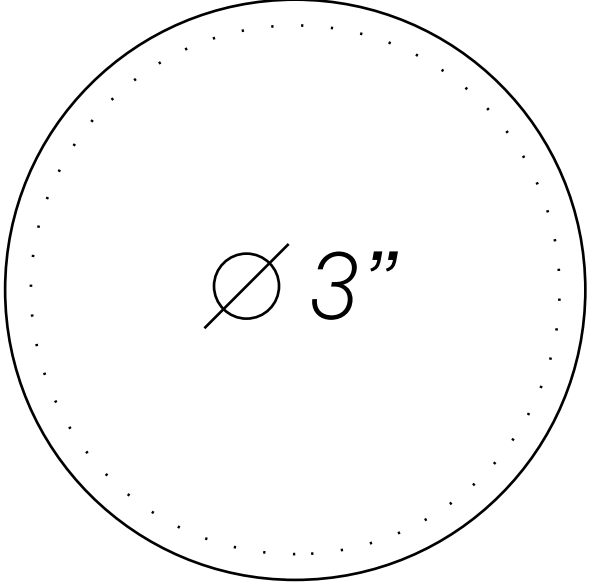

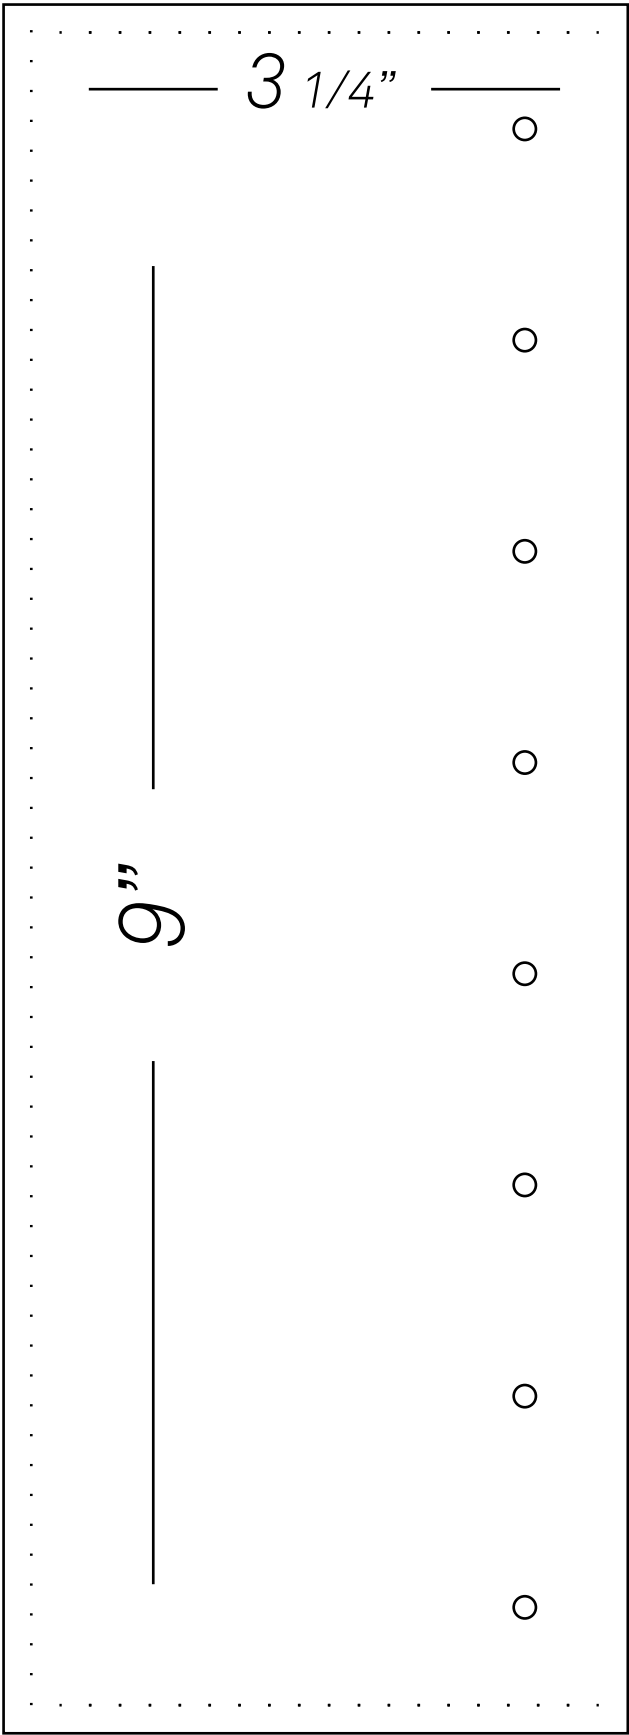

Use leather up to 3 oz (1-1.5 mm thick) Thicker leather can work as well but I would not use anything thicker than 4 oz for this pattern. The holes are marked for 3.85 mm pricking irons.

The drawstring slide width will depend on your drawstring thickness. Make sure it will be able to go through it snugly or adjust the size.

Make sure the body length has same number of holes +1 as the bottom (the circle). Like, for 3.85mm irons the circle has 56 holes and the bottom length has 57 holes.

I like to stitch the whole bag in the overlay manner: Body layer goes on top of bottom circle layer, and the back stitch is made in the same way. Refer to my photos. Though if you prefer some other kind of stitching it will also work just make sure you adjust the holes accordingly.
