Step 8

Позиции G, H, i, j, K, L, M следует вымочить в строительном клее ПВА, для придания жесткости. Я вымачивал в морилке для дерева на водной основе, но на практике клей ПВА дает большую жесткость.

Positions G, H, i, j, K, L, M should be soaked in PVA construction glue to give rigidity. I used wood stain, but in practice, PVA glue gives more rigidity.
