

PRINTER CHECK

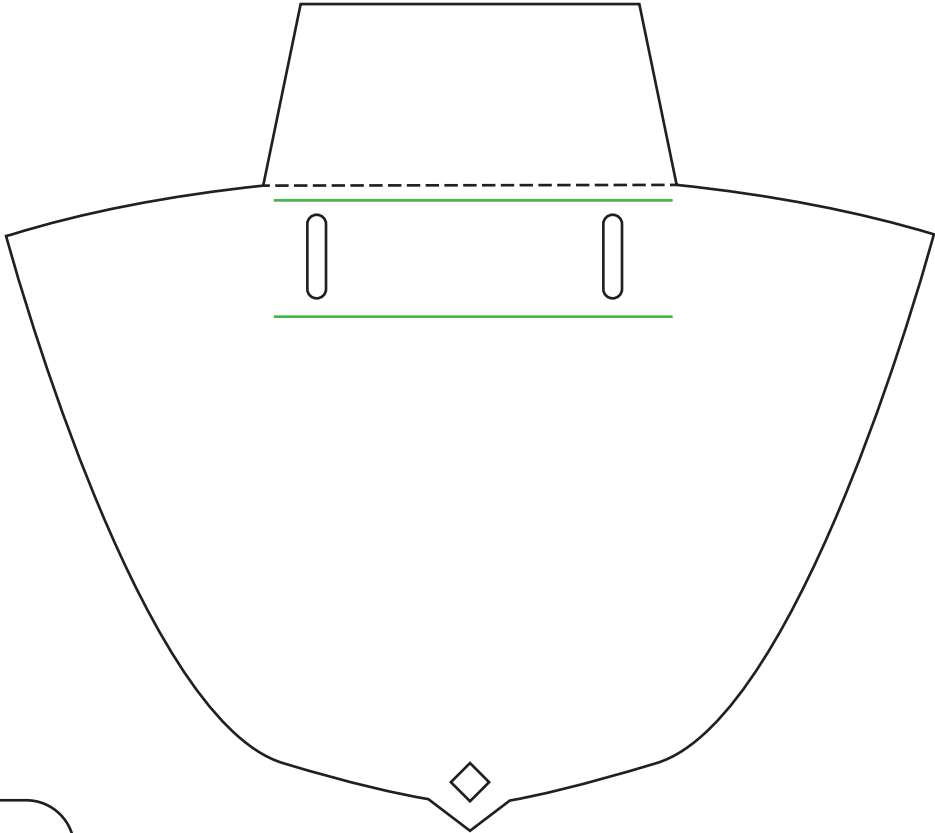

To verify the pattern prints accurately, make sure this square prints exactly as a 1 x 1 inch square

- NOTES:**
- This is for infants aged approximately 9-12 months.
 - I used 3-4 oz cow hide deer tanned leather for the upper and 3 oz suede for the sole.
 - You can definitely sew this by hand
 - I used 1/4 in elastic
 - Dash marks represent fold lines.

- BASIC INSTRUCTIONS (video may help here)**
- Cut out and trace pattern onto leather. Cut out the leather.
 - Fold at the dash marks and glue/tape down. Add heel tab if desired.
 - Sew at the green lines.
 - You will glue/tape it together inside out (so you will see the flesh side). Attach back piece first using the pointy part to line it up. I indicated the back part using a star. After attaching the back piece, attach the front piece. I indicated the front piece using a diamond.
 - Sew everything together.
 - Cut off pointy parts.
 - Turn the shoe.
 - Thread the elastic through all the holes. Attach the elastic and sew it together.
