Instruction video on youtube
under Paintyee

This project requires:

- shoelace/ribbon/string/elastic
- 5 or 6 oz leather
- 0.8mm thread

————— Cut
- - - - - Stitch

Note* After stitching everything, if you find that the tips of the horn are not together but split, put a small dollop of glue (I used E6000) inside the tips to keep the three panels together into a uniform shape.
