

Hello

My name is Behlul

Thank you for purchasing the product.

I tried to make the product error-free. I made a video for you to see how I did it. It will be a clue to understand how it's done.

There are many questions as to why you didn't provide a written instruction. My English is not good and I write using google.

I'm trying to show it in detail in the video because I can't explain what I want to tell correctly.

My recommended leather thickness is 1.8mm -2.8mm. Medium hard and soft leather can be used.

I used two leathers. soft leather with brown color. I used cream to harden it, (about 1.9 mm - 2.1 mm). Patterned leather is of medium hardness (approx. 1.7 mm - 1.8 mm). Since it is thin, I used two coats where the rivet was attached.

It is an easy project that you can do with ease. the holes are 4 mm from the corners. It can be easily sewn on the sewing machine.

Check the dimensions first.

For the holes you need punches with a pitch of 5 mm. Be careful before cutting. For more precise cuts, I recommend a sharp blade and an oblique grip.

Do not rush the cutting process.

Those who want to paint or polish the edges should first do the part where the zippers and card holders will come. other parts can be made later.

I used two 18cm zippers and cut off the excess.

I pre-drilled the holes in the zipper with a small tool for easy sewing.

you can do it on the last page using lining or thin fabric.

This bag is a very useful bag, I left holes for those who want to attach it to the belt. Those who don't want it don't need to drill. I hope you enjoy crafting.

Let me know if you have any questions, I may be delayed due to the time difference. I need to sell more to stay afloat in this business.

I need your stars and comments so that others can buy my products and it motivates me better.

I work on demand. If there is a model you can't find the drawing of or if you have an idea, I can draw it for you. You can share your ideas.

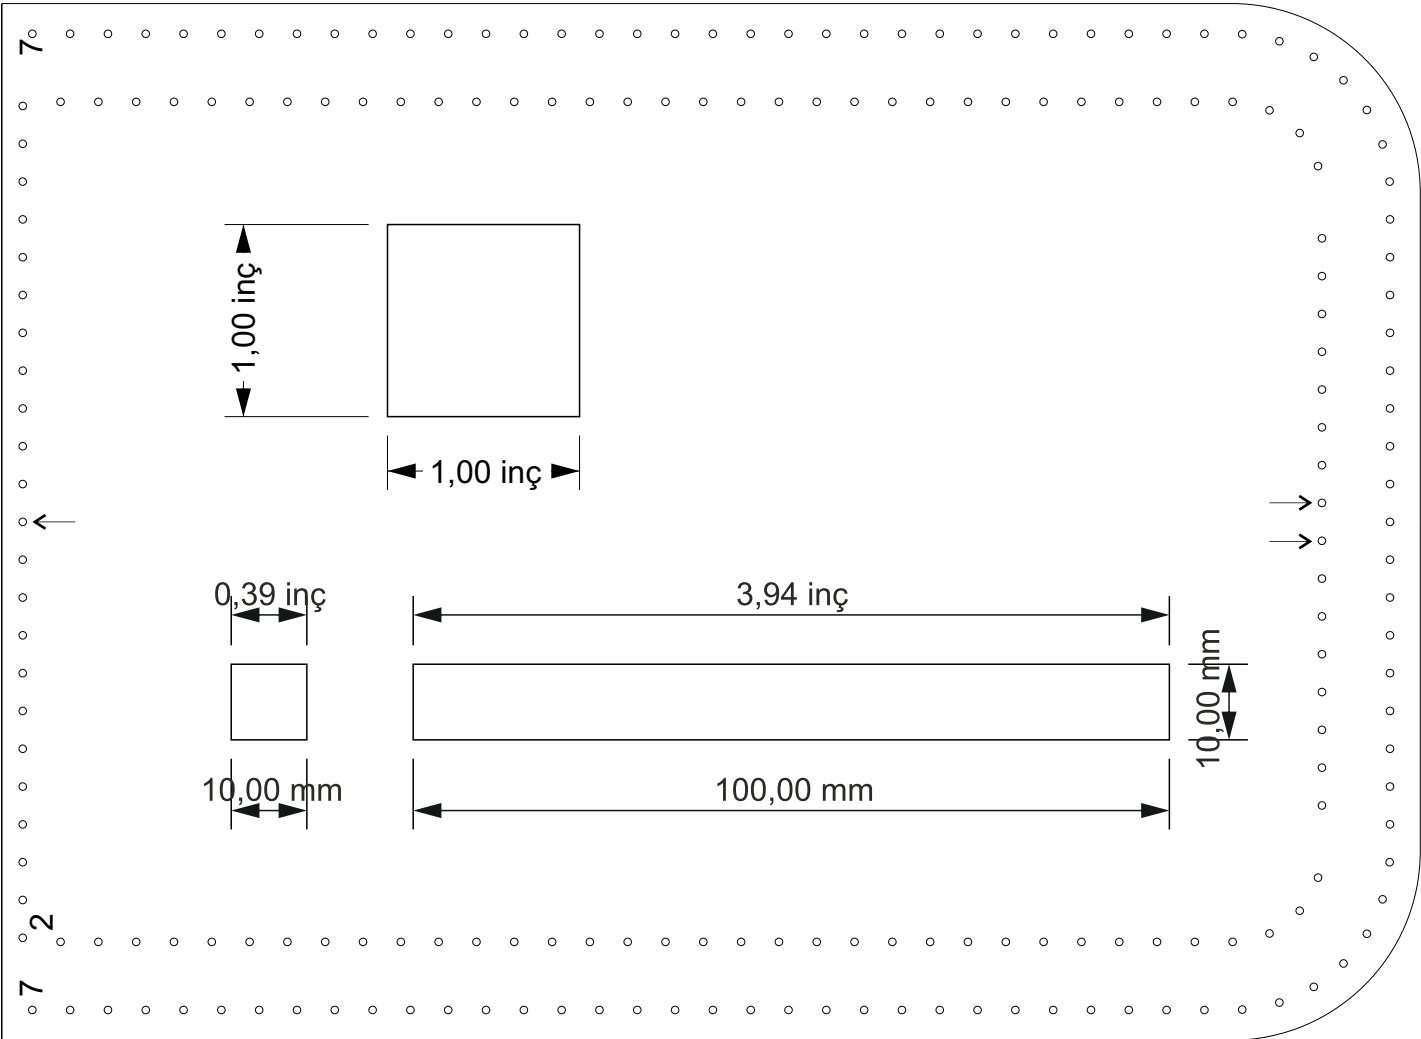

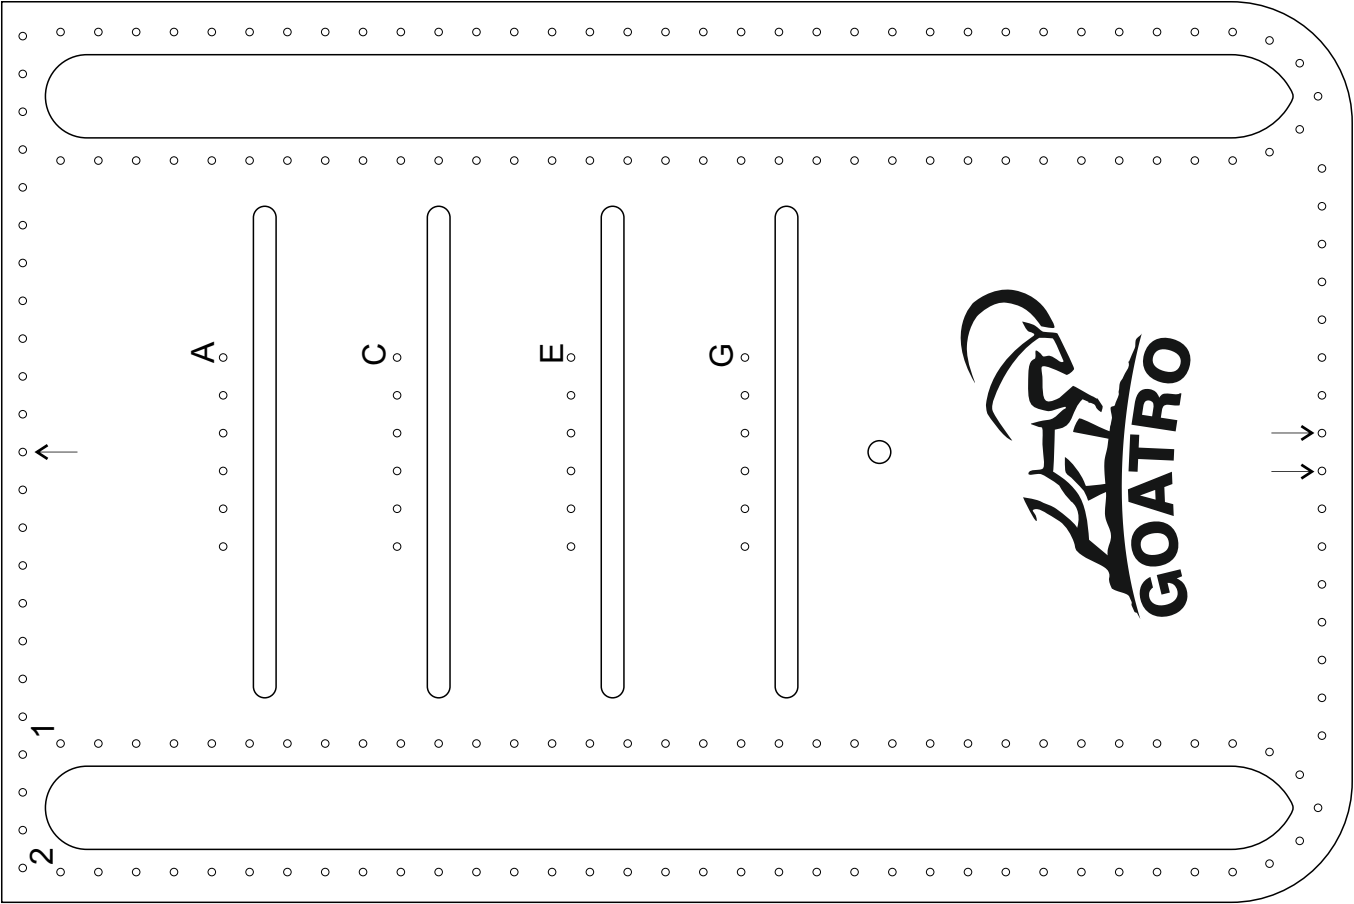

Make it with love, use it with love.

You do not need to print this page. The model starts after this page.

Thank you :)

I recommend those who use thin leather to use this part in 2 layers. The rivet hole may differ according to the thickness of the leather used, I recommend you to align and drill after it is finished.
