LEATHER GOODS

THE LEGOLAS

WALLET | CARDHOLDER

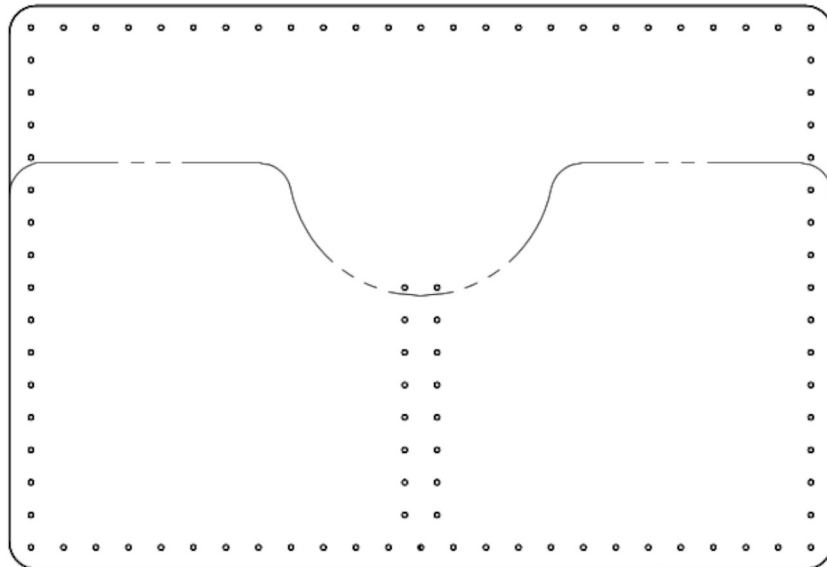

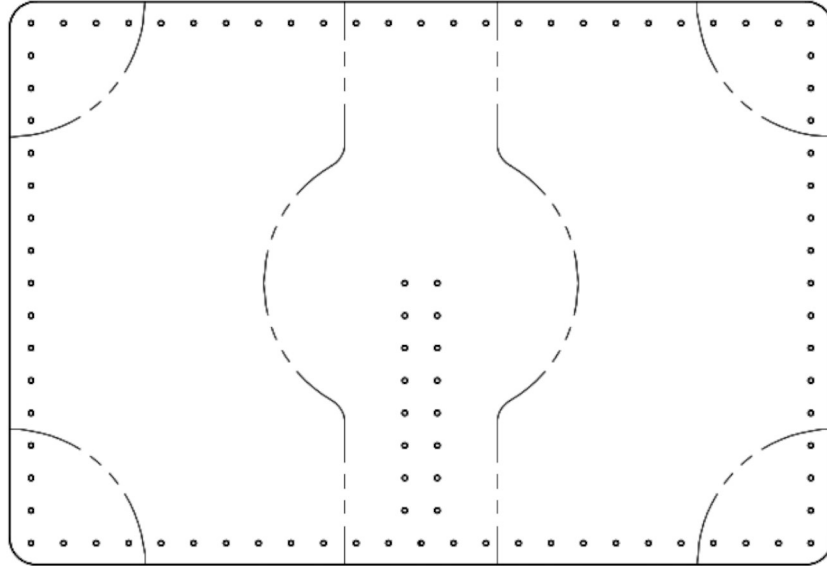

PDF PATTERN AND INSTRUCTIONS

PROJECT OVERVIEW

(expected build result)

The Legolas Wallet | Cardholder

Dimensions: 6" x 4"

This pattern comes with two varieties of interior pockets for you to choose from based on your preferences. Mix and match as you see fit! The showcase wallet uses pockets with the corners knocked out.

INSTRUCTIONS & TIPS

Tools/Materials Needed:

- 1 square foot of Leather (between 3-5 ounces)
- 1-1.5mm hole punch (6mm between holes)
- Approximately 1 meter of thread
- Adhesive or leather tape to hold pockets in place (keeps the edges together better than stitching alone)

Tips when building:

1. First, cut out all pattern pieces and tape to your leather. Punch then Cut each piece
2. Apply your preferred leather treatments (dye, mink oil, tokonole (to the flesh side)
3. Burnish only the non-stitched (non-hole punched) sides of each pocket as it will be difficult to do once the wallet is stitched together.
4. Glue the exterior pocket STITCHED edges to the main body first, then titch the decorative X pattern (cross-stitched) to attach the main body to the exterior pocket. In the showcased photo i chose rto display the X on the exterior.
6. Stitch along the outer edge of the wallet with a double back stitch hidden below the line of Xs.
7. Finish the edges of the wallet in your preferred method (sand with 320g sandpaper, edge dye, tokonole, beeswax)
8. Apply any leather protectants/balms to finished piece
9. Lastly, **AND MOST IMPORTANTLY**, send me a pic of your finished product so i can give you a virtual high five and a discount code for your next PDF Pattern Purchase! **Ya did good, kid!**
