PRINTING THE PATTERN

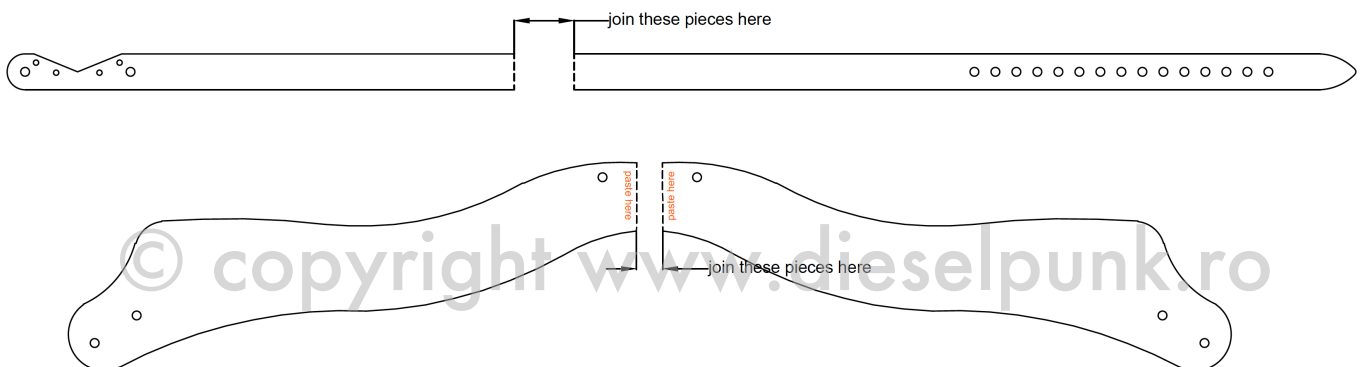

© copyright www.dieselpunk.ro

Set up your printer to A4 paper with no margins on landscape mode.

Alternatively you can use “letter” format which is approximately the same size and will not impact the size of the product significantly

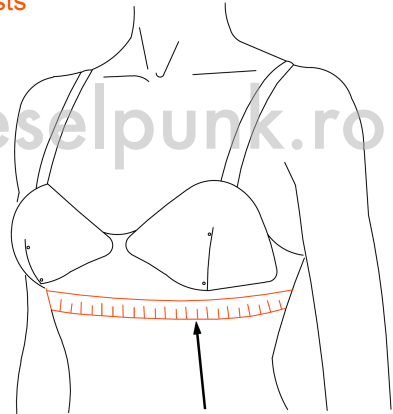

Print all the patterns. Some of the pieces spread over multiple pages. Use the diagram below to join them together

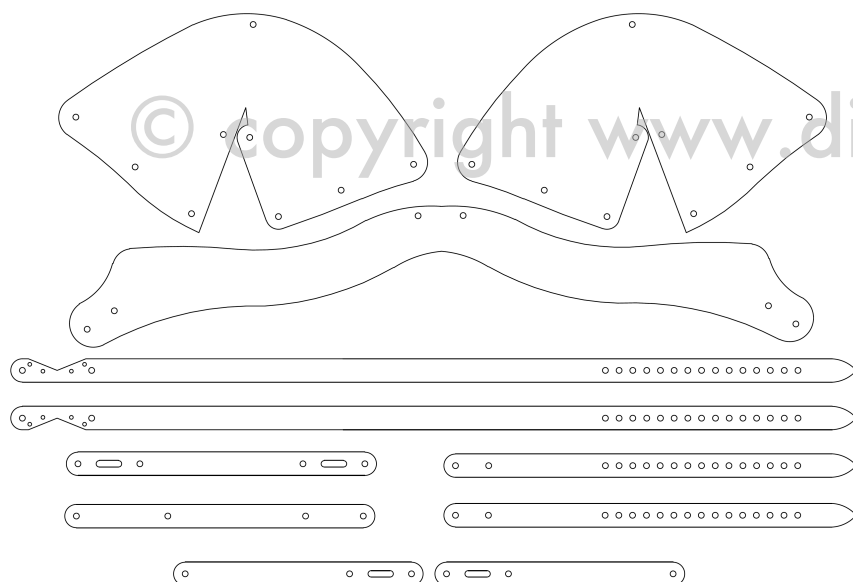

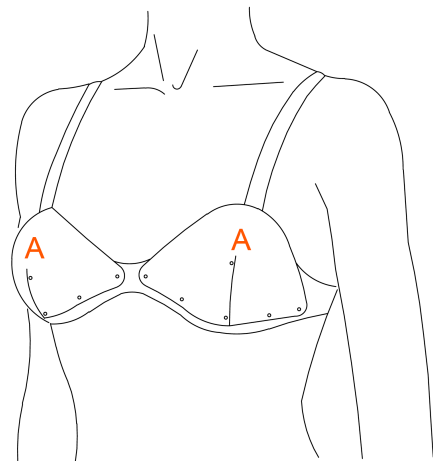

To get the right size for your bra first use a soft tape to measure the circumference of your ribcage just underneath the breasts

Before you start working you need to select your size. Use the picture to the right to guide you in choosing your right band size:

Same with the cup size

Choose the right size for your band and then combine it with the pattern for your cup size

Once you cut all the leather pieces needed you should have everything shown in the picture to the left
