

DUFFLE3-A

Hardware lists

- 616mm/24.25inch #5 zipper
- Four 1" Rectangular rings
- Five Bag feet
- Two 620mm/24.4inch Long Cotton Cord

General Question

- Tutorial: <https://youtu.be/I2gWibG6yGQ>

- The project consists of 18 different pieces (duplicated pieces are not included)

- In page 28th, a completed diagram shows the assembly of all pattern pieces.

- In the lower right corner of each page, you should be able to find a small label, as such a-3 or b-4; please re-arrange all pages as the order showing in page 28th.

- This project will include pattern pieces for the liner. The marked seam allowances is 10mm(3/8inch).

- If you decide not to include liners for this project, please feel free to skip page 14 to 27.

- The overall stitching length is around 6mm.

- To provide difference tension for the structure, the stitching holes are not evenly distributed in the lower portion; In the certain part, you may find the stitching length is slightly larger or smaller than 6mm. No worries. It is designed as the way it is. In this case, I would recommend preparing a punch/stitching chisel with single tooth.

Material recommendation

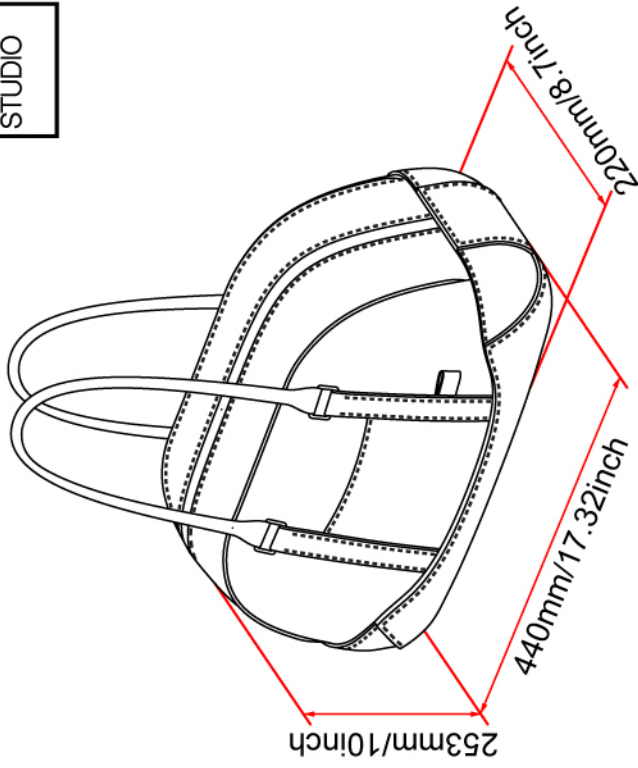

- 5.5oz(around 2.2mm) soft veg tan leather/bison leather/chrome tan leather (Upper portion)
- 5.5-6oz (around 2.2-2.5mm) Firm temper veg tan leather (Lower portion)
- 0.6mm waxed thread
- Waterproof or water resistance fabrics/Canvas/0.3mm suede or pig skin (Liner)

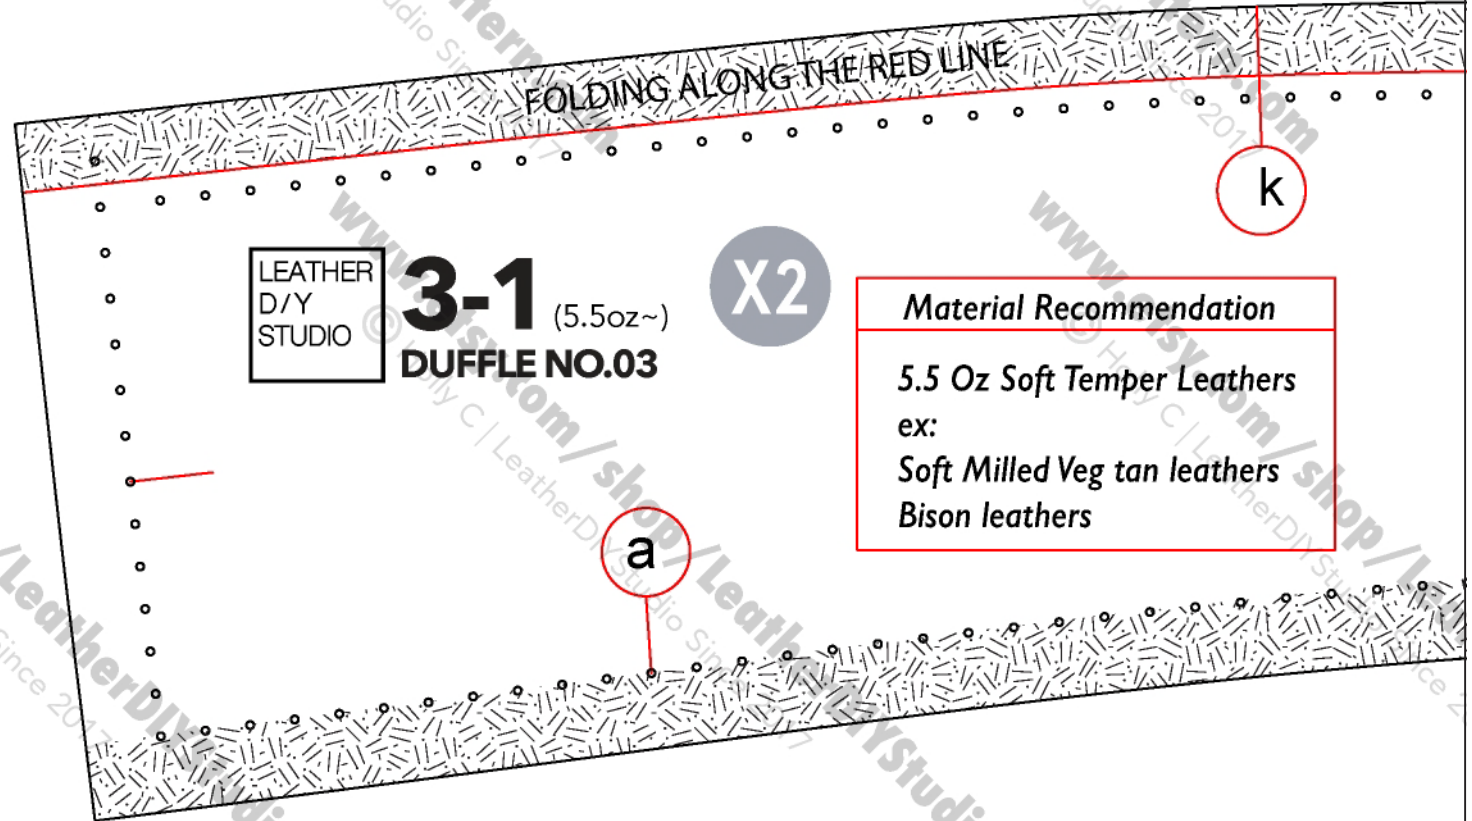

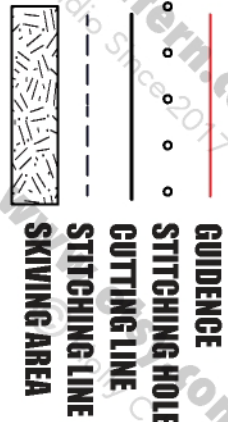

Why the materials?

- The lower portion of the bag is built with tensile forces. It is curial to choose leathers that have the ability to hold forces without too much deformation; leathers that are soft or weight under 5oz are NOT recommended

- I recommend choosing soft or soft-medium temper leathers for the upper portion of the project. With such materials, you can flip the structure without creasing the leathers.

Thank you for supporting the business. Let me know if there are any questions.
Have fun with the project!
