- 1.About leather: **Soft veg tanned leather** is highly recommended for this project.
- 2.About thickness: As you have seen in the tutorial video, I glue two pieces of leather together to get the idea thickness. By doing so, it's clean inside the bag but need much more leather. You can use single piece of leather with the idea thickness.

Thank you so much for your purchase. Please consider posting your work and leaving a 5-star review if you like this pattern. It would be much appreciated.
